Component	Quantity
Speaker -----	2
Bracket -----	2
Manual -----	1

Introduction

Thanks for using our speaker. All of our products are tested directly before leaving the factory, with guaranteed quality.

Our speaker are widely used in school, gymnasiums, square halls, garden, parking, railway station, airport, villa, supermarket and so on. They will be your best choice for public address system.

For better installation, commissioning and use of products, please read this manual in details before installation

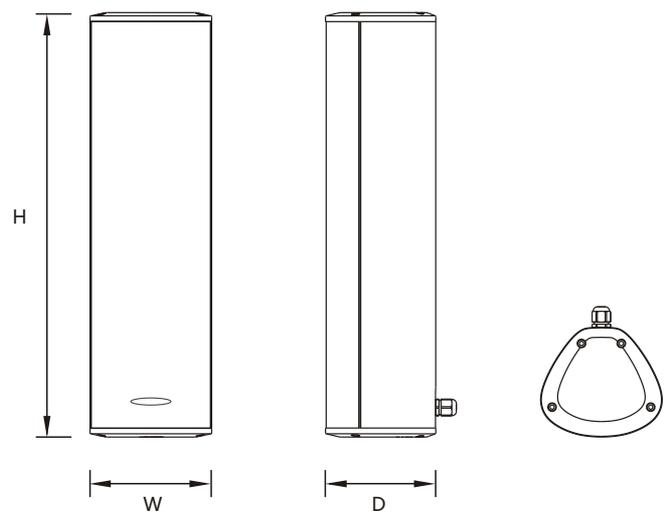

Product features

The speakers are made of aluminum alloy housing, with a fine, with surface UV Anti-ultraviolet paint treatment, with a strong textured appearance and capable of providing professional levels.

The sound performance can meet the demanding requirements of the site.

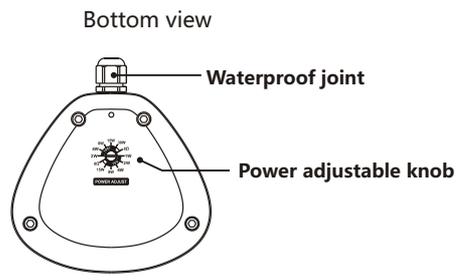

- Outdoor design, waterproof unit, suit for outdoor and indoor.
- Small and elegant appearance, suit for all kind of decoration place.
- With 3 "Gray polypropylene drum paper full frequency cone-type bass unit and 2" treble unit combination, frequency response wide, bass level clear, treble clear and bright.
- With power tap, independently adjustable, multiple choices of input mode.
- Solid aluminum alloy box, not easy to deformation and rust.
- E type pure copper wire audio transformer to ensure fidelity of audio output.
- Equipped with multifunctional mounting bracket, convenient installation

(dB SPL, 1W, 1m)

DSP255II Distortion
(THD < 5% 1W, 1m, 100Hz-10kHz)

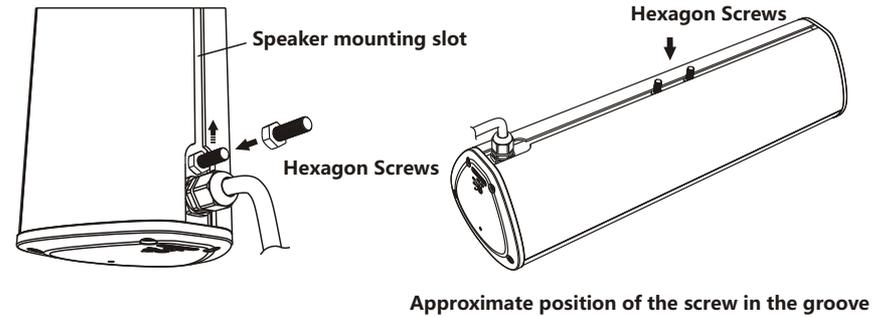

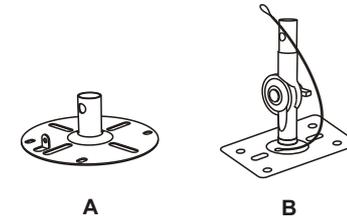

DSP455II Distortion
(THD < 5% 1W, 1m, 100Hz-10kHz)

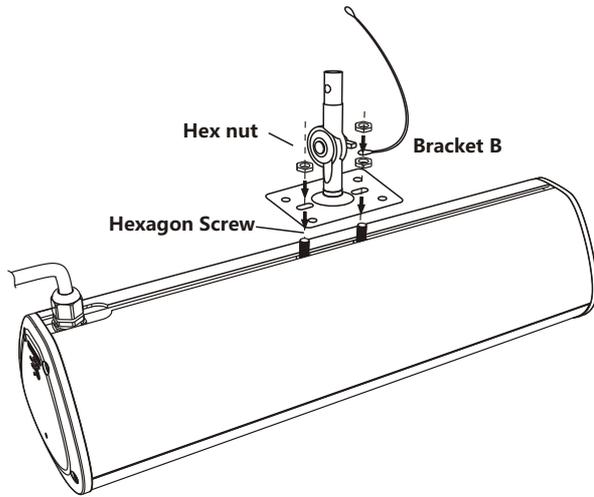

Installation

① Split the mounting bracket into A, B, two parts. Fit two six point screws into the mounting slot of the Speaker's back (parallel to the column to help fit the screws)

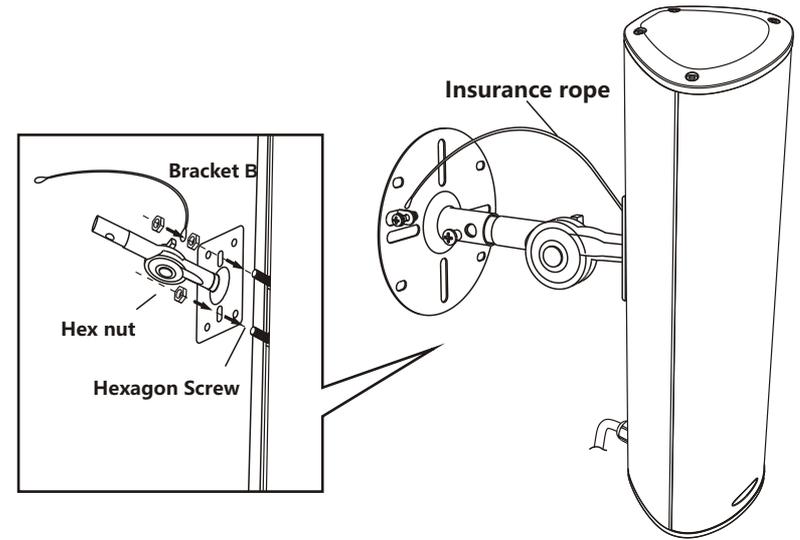

! When placing speakers horizontally, be careful not to touch and load the front of the speaker net with hard facing, otherwise it will deform the front net.

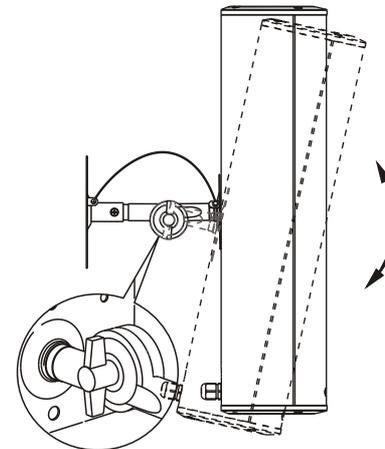

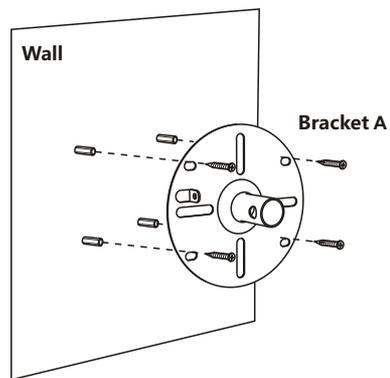

② Fix the bracket B with the two screws. Please make sure that the position of the bracket B needs to be installed and then lock the nut

④ Fix the bracket B on the back of the speaker and the bracket A on the wall. Adjust the upper and lower angles of the loudspeaker first, then screw the knob tightly.

③ As shown in the following figure, bracket part A is fixed on the wall where the speakers need to be installed (the screws of the fixed bracket assembly A are owned).

Adjustable speaker suspension angle
