

WH-2FRS

Dual-channel Volume Controller with Override Function

Description

This product is a 2-channel constant-resistance volume controller with override function. With streamlined design and rounded corners, it is made of high-quality ABS plastic, and the panel is sprayed with colorful paints. It has 5 gears of volume adjustment, and supports simultaneous volume adjustment of 2 channels.

Features

- With streamlined design and rounded corners, it is elegant and beautiful in shape; the panel is sprayed with colorful paints for a bright color, which can effectively resist scratches.
- With large knob design, easy to rotate and labor-saving.
- Made of high-quality environmentally friendly ABS plastic, tasteless and odorless, harmless to the human body.
- Impact resistant, not easily deformed.
- With 5 gears of volume adjustment.
- Support simultaneous volume adjustment of dual channels, with the maximum power for a single channel of 30W, and the maximum power for dual channels of 60W.
- Support 12-24V override input control.
- Support constant resistance 4-16Ω access.

Specifications

Model	WH-2FRS
Rated Power	4-16Ω, 30W
Override Signal	DC12-24V 20mA
