

D6564

Professional Speaker

Description

This conference speaker is a versatile audio device featuring an inverted phase design for enhanced low-frequency performance, with an elegant appearance and easy installation, suitable for various meeting and event settings.

Features

- Phase-inverted bass-reflex two-way full-range system.
- The wooden speaker enclosure is coated with black speckled water-based paint, with acoustic sound-penetrating cotton attached to the back of the metal mesh.
- With high-efficient and high-quality units, it can be suspended for installation.
